## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-4, 6, 7, 9-12, 17, 19, 21, 23, 25-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Giampavolo et al ('246) in view of Heuss et al. The patent to Giampavolo et al teaches structure substantially as claimed including a guard including guard sections, joint, signage accepting structure, the only difference being that the guard sections does not include a bottom portion wider than the top portion. However, the patent to Huess et al teaches the use of providing a wedge shaped member to provide better strength and stability. It would have been obvious at the time of the invention to modify the structure of Giampavolo et al to include wedge shaped portions, as taught by Heuss et al since such structures are conventional structures

used in the same intended purpose, and further, such modification would have produced predictable results, thereby providing structure as claimed. With respect to applicant's remarks and the amendment to the claims, it is noted that the patent to Giampavolo et al teaches the use of all structure as claimed except for the wedge shape. The patent to Huess et al teaches the use of such a shape to provide more stability to be old.

### ***Allowable Subject Matter***

Claim 14 is allowable over the prior art of record.

Claims 13, 15, 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

Applicant's arguments filed 11/21/07 have been fully considered but they are not persuasive. See above rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
